SWETHA G

|swethagovindan05@gmail.com|+91-9025493677|linkedin.com/in/swetha-g-swetha-9749a4364 |

CareerObjective:

Full Stack Developer with 8 months of hands-on development experience in building and maintaining web applications using React.js, Angular, JavaScript, Node.js, Express.js, MongoDB, and SQL. Experienced in REST API development, database management, debugging, testing, and frontend-backend integration. Familiar with Agile methodologies, Git, and the Software Development Life Cycle (SDLC). Eager to contribute to scalable web application development, learn emerging technologies, and build reliable software solutions.

Education:

Surya Group Of Institutions,Vikravandi,Villupuram Diploma in ComputerScienceandEngineering–2025	Percentage 79%
St. Joseph's HigherSecondarySchool Class 10th (SSLC)	65%

Skills :

- P**rogramming Languages:** JavaScript, Python, SQL
- **Frontend Development**: React.js, Angular, HTML5, CSS3, Bootstrap
- **Backend Development:** Node.js, Express.js, Flask
- **APIs & Integration**: REST API Development, Frontend-Backend Integration, API Testing
- **Databases:** MongoDB, MySQL, SQLite
- **Testing & Debugging:** Functional Testing, Integration Testing, Regression Testing, End-to-End Testing, Playwright
- **Tools & Methodologies:** Git, GitHub, VS Code, Agile, Scrum, SDLC, STLC
- **AI/ML:** TensorFlow, Scikit-learn, Deep Learning Fundamentals

PROFESSIONAL EXPERIENCE:

💼 **Full Stack Developer Intern (MERN Stack) AND AUTOMATION:**

Company: Harxa Tech, Vandalur

Duration: 19/01/2026 - 01/08/2026

- Harxa Tech, Vandalur | 8 Months
- Developed and maintained web applications using React.js, Node.js, Express.js, MongoDB, and SQL.
- Built and integrated RESTful APIs to enable seamless communication between frontend and backend services.
- Implemented CRUD operations, authentication, authorization, and data validation functionalities.
- Developed reusable frontend components and maintained clean, structured, and maintainable code.
- Worked with databases for data modeling, data retrieval, storage, and query optimization.
- Identified, debugged, and resolved application issues to improve performance and reliability.
- Performed functional testing, defect validation, and regression testing to maintain software quality.
- Participated in SDLC activities, including requirement analysis, development, testing, debugging, and deployment.
- Collaborated with team members in an Agile environment to deliver application enhancements and technical solutions.

Projects :

Surevelcap / Captionomaly – Deep Learning-Based Video Anomaly Detection

- Developed a deep learning-based system to identify anomalous activities in video sequences.
- Worked with the UCF-Crime dataset for anomaly detection and UCFC-VD dataset for video captioning.
- Used ResNeXt-101 for feature extraction and a GRU-based model for video caption generation.
- Applied GloVe embeddings for text representation in the captioning pipeline.
- Evaluated anomaly detection performance, achieving an AUC of approximately 78.2%.

HireHub – AI-Powered Mock Interview Platform

- Developed an AI-powered mock interview platform with ATS-based resume scoring using Angular, Node.js, and SQL.
- Integrated REST APIs, user authentication, and interview performance tracking.
- Built application features to support interview preparation and resume evaluation.

TECHNICAL INTERESTS:

Full Stack Development | Web Application Development | Backend Development | REST API Integration | Software Testing | AI-Powered Applications
